

Charging Stations

TRENDING

Charging stations are a hot market in advertising. Consumers have more digital devices than ever and often need to charge on the go. A wide variety of charge stations can be branded to fit your client's marketing campaign.

What does Elite Fleet do?

We design, print and install vinyl wraps for all types of charging stations. Our process is flexible: we can install on location, have your equipment freighted to our offices for application, or just ship the die-cut graphics for you to apply. Any way you want to do it, call or email us for a fast estimate.

How long does it take?

The industry moves quickly and clients demand instant grati. We can print and install as soon as same-day. Normal turnaround is one to two days plus Fedex ground shipping.

Are you reliable?

We stand behind our wraps and fix any problems. We use top quality, warrantied 3M and Avery media.
