

Chrome Delete

WE COVERED

SATIN BLACK

TRIM JOB

Chrome Delete is the newest trend in custom vehicle mods. We cover the trim, grill and other chrome parts with gloss or satin black vinyl. This creates a unique look that totally stands out from the crowd. For complex pieces like emblems that can't be wrapped, we can powdercoat paint to match.

How does it work?

Just like wrapping a normal car panel, we use vinyl film to cover the chrome for a new look and texture. The vinyl is removeable without affecting the original finish.

How long does it take?

Depending on your choice of paint and number of parts, most jobs can be completed in 1-2 days.
