

Powdercoating

RIMS

For parts that are hard to wrap, we now offer powdercoating. It's a special thick, durable paint finish available in a variety of styles and colors. Powdercoating looks amazing and strongly resists nicks and chips, making it ideal for upgrading your rims to compliment or contrast your body wrap.

CHROME RED

SATIN BLACK

METALLIC BLUE

CHROME GOLD

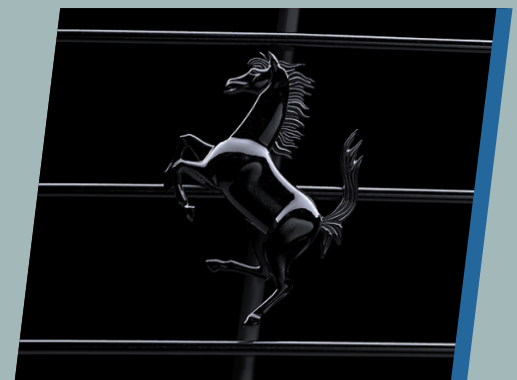

MATTE BLACK

What else can be powdercoated?

While rims are the most common, we can powdercoat other pieces. Exhaust pipes, emblems and door handles are other popular choices. If it's metal and easily removeable, we can handle it.

How long does it take?

Depending on your choice of paint and number of parts, most jobs can be completed in 2-3 days.
